BRINGING QUALITY TO THE SURFACE

## Quality. Experience. Stability. Integrity.

At Sportexe, we understand you're not just buying synthetic turf. You're investing in a stronger program. Years of quality construction. And customer service from a team who understands what that means.

Over the past 20 years, Sportexe has earned an unsurpassed reputation for producing and servicing high-performance synthetic turf systems for every level of competition. We're the field of choice for the Baltimore Ravens, New Orleans Saints, LSU Tigers, Alabama Crimson Tide, Cal-Berkeley Golden Bears and hundreds of other organizations around the world.

Let us show you the  
Sportexe difference.

WE USE THE BEST COMPONENTS  
AND LATEST TECHNOLOGY TO  
ENGINEER EVERY SQUARE INCH  
OF OUR HIGH-QUALITY  
SYNTHETIC TURF SYSTEMS

## PowerBlade HP

The PowerBlade HP synthetic turf system features our high-performance monofilament fiber. The unique triangular cross-section and special polymer formulation of this fiber create an amazingly soft and resilient playing surface with the durability you expect from a true monofilament turf system.

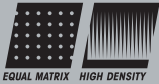

**PowerBlade HP's** infill mixture of SBR rubber and sand provides a firm surface for predictable, consistent ball roll and increased player performance, yet meets the high safety requirements of all Sportexe synthetic turf systems.

All of this ensures your **PowerBlade HP** synthetic turf system will maintain its natural look, amazing softness and high-performance year after year.

Madison High School, Madison, NJ.

# SPORTEXE®

## Effective Pile Weight

A = Turf height above infill

B = Infill depth

C = Backstitch

$$EPW = \frac{2a}{2a+2b+c} \times \text{Pile Fiber Wt.}$$

$$\% \text{ Effective} = \frac{EPW}{\text{Pile Wt.}} \times 100$$

## POWERBLADE HP

- A true monofilament synthetic turf system
- Extremely soft, yet durable
- No post-fibrillation (fiber breakdown)
- Two-tone fiber provides a more natural-looking field
